

Green Schools Travel Theme

St Columbas college has commenced work on the travel theme. On Tuesday 18th November between 8.30 and 9.30 we carried out a survey on the number of vehicles travelling up and down Drumboe Avenue dropping students at the school gate. A staggering 235 cars 16 vans and 3 buses passed along the avenue. This created a long tailback and a 10 to 15 minute delay accessing Main Street Stranorlar.

As part of our school travel theme we would like to reduce the traffic on the avenue by encouraging students to walk up the avenue from Main Street Stranorlar. This initiative would have a number of benefits, students would feel fresher fitter and more alert for the school day ahead. They would also have the opportunity to talk to their friends.

This small change would create a healthier environment and a more sustainable future by reducing green house gas emmisions.
